Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time, and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table shows the Fund's ranking on the Risk and Reward Indicator. The lowest category does not mean a risk-free investment.

Commentary and Outlook

The portfolio lagged its benchmark index on a gross basis over the quarter.

The overweightings in Ireland and materials added value, as did the underweighting in healthcare. However, the overweight exposure to Sweden proved a hindrance and stock selection detracted in aggregate.

Positive relative contributors included Pernod Ricard and Essilor. Drinks firm Pernod Ricard delivered encouraging growth, especially in emerging markets. Sales of international brands such as Jameson, Martell and Absolut were particularly strong. Eyewear firm Essilor outperformed amid optimism that regulatory clearance for the proposed merger with Luxottica will be granted in the near future.

Detractors included building-materials firm CRH; trading has been impacted by competition in Asia – markets are more favourable in the US and Europe, though the UK economy is a concern. Ryanair was another laggard; the budget airline prides itself on its low cost-base, but may have to increase wages – management agreed limited union recognition after pilots threatened to strike.

Fund Objective & Policy

To invest the assets of the fund primarily in European equities, excluding the UK. It aims to achieve total returns that are 2% or more per annum above its benchmark, gross of fees, over rolling 3 year periods.

Risk Warnings

Investment Risk: The value of investments can fall as well as rise and investors might not get back the sum originally invested.

Political and Financial Risk: The fund invests in markets where economic and regulatory risk can be significant. These factors can affect liquidity, settlement and asset values. Any such event can have a negative effect on the value of your investment.

No Capital Guarantee: Positive returns are not guaranteed and no form of capital protection applies.

Investment in Funds: The Investment Policy allows the fund to invest principally in units of other collective investment schemes. Investors should consider the investment policy and asset composition in the underlying funds when assessing their portfolio exposure.

Currency Risk: Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
